

Native Aspergillus melleus Acylase I

Cat. No. NATE-0029

Lot. No. (See product label)

Introduction

Description In enzymology, an aminoacylase (EC 3.5.1.14) is an enzyme that catalyzes the chemical reaction:N-acyl-L-

amino acid + H2O↔ carboxylate + L-amino acid. Thus, the two substRates of this enzyme are N-acyl-L-amino acid and H2O, whereas its two products are carboxylate and L-amino acid. This enzyme belongs to the family of hydrolases, those acting on carbon-nitrogen bonds other than peptide bonds, specifically in

linear amides. This enzyme participates in urea cycle and metabolism of amino groups.

Synonyms aminoacylase 1; aminoacylase I; dehydropeptidase II; histozyme; hippuricase; benzamidase; acylase I;

hippurase; amido acid deacylase; L-aminoacylase; acylase; aminoacylase; L-amino-acid acylase; α -N-acylaminoacid hydrolase; long acyl amidoacylase; short acyl amidoacylase; ACY1 (gene name); N-acyl-L-

amino-acid amidohydrolase; EC 3.5.1.14; 9012-37-7

Product Information

Source Aspergillus melleus

Form powder.

EC Number EC 3.5.1.14

CAS No. 9012-37-7

Activity >0.5 units/mg

Unit 1 U corresponds to the amount of enzyme which hydrolyzes 1 μmol N-acetyl-L-methionine per minute at

Definition pH 8.0 and 37°C

Storage and Shipping Information

Storage 2-8°C

Tel: 1-631-562-8517 1-516-512-3133 **Email:** info@creative-enzymes.com
