Creative Enzymes®

Pediococcus acidilactici

Cat. No. PRBT-124

Lot. No. (See product label)

Introduction

Description	In the agricultural sector, Pediococcus acidilactici is often included in animal feed to promote better digestion and nutrient absorption. It helps to balance the gut microbiota, inhibit the growth of pathogenic bacteria, and enhance the overall immune response of the host. By maintaining a healthy gut environment, it can contribute to improved growth rates, better feed conversion, and reduced incidence of disease in livestock.
