Native Bovine Factor XIa

Cat. No. NATE-0869

Lot. No. (See product label)

Introduction

Description	Bovine Factor XIa is purified from freshly collected Bovine Plasma using a combination of salt precipitations and activation on a negative surface. This Factor XIa is a potent activator of both Human and Bovine Factor IX. Bovine Factor XIa purity is determined by SDS-PAGE and shows complete reduction upon incubation with 2-mercaptoethanol.
Synonyms	Bovine Factor XIa; Factor XIa

Product Information

Species	Bovine
Source	Bovine
Concentration	1.25 mg/ml
Buffer	50 mM Tris/ 0.1M sodium chloride/ pH 8.0-HCl

Storage and Shipping Information

Storage	< -60°C
