

Cheirolin

Cat. No. COEC-110

Lot. No. (See product label)

Introduction

Description Cheirolin is a glucosinolate from plants of the Brassicaceae family which has shown to be a potent inducer of phase II detoxification enzymes.

Applications A phase II detoxification enzyme activator

Synonyms 1-Isothiocyanato-3-(methylsulfonyl)-propane

Product Information

Form Solid

CAS No. 505-34-0

Molecular Formula C₅H₉NO₂S₂

Molecular Weight 179.26

Melting Point 47.5° C

Boiling Point 200° C

Solubility Slightly soluble in water
