

Guarana Extract

Cat. No. CEFX-064

Lot. No. (See product label)

Introduction

Description Guarana extract is a substance extracted from the seeds of guarana and contains caffeine, theophylline, theobromine, tannin, saponin, various catechols, and other trace substances. Guarana extract stimulates the nerves gradually and slowly, the stimulation is maintained for a long period of time, and the stimulation is relatively mild and harmless. Guarana extract prevents fat formation and breaks down fats, aphrodisiac, cytoprotective (repairs DNA damage caused by nitrites) and antioxidant.
