

L-Lactate Dehydrogenase from Porcine, Recombinant

Cat. No. NATE-1105 Lot. No. (See product label)

Introduction

- **Description** A lactate dehydrogenase (LDH or LD) is an enzyme found in nearly all living cells (animals, plants, and prokaryotes). LDH catalyzes the conversion of pyruvate to lactate and back, as it converts NADH to NAD+ and back. A dehydrogenase is an enzyme that transfers a hydride from one molecule to another.
