

Mung bean protein

Cat. No. EXTZ-102

Lot. No. (See product label)

Introduction

Description Mung bean protein is produced from raw mung bean *Vigna radiata* (Linn.) Wilczek, which is considered to be top quality, GMO-free, allergen free, pesticide free and nutrient-rich. The beans undergo a gentle and toxin-free process in order to naturally increase digestibility and protein 85% content. Mung bean protein provides neutral flavor and strong stabilizing properties while delivering a better mouth feel. It can also serve as a replacement for creamers and gums.
