

Schizophyllan

Cat. No. EXTZ-438

Lot. No. (See product label)

Introduction

Description Schizophyllan (Sonifilan, SPG) is a neutral extracellular polysaccharide produced by the fungus *Schizophyllum commune*. SPG can activate the vitality of TC cells, NK cells, and macrophages, and can promote the secretion of various lymphokines such as IL-1, IL-2, IL-3, and IFN, which has the effect of enhancing immune function.
