

Topoisomerase IV from Staphylococcus aureus, Recombinant

Cat. No. NATE-3204

Lot. No. (See product label)

Introduction

Description Topo IV (from Staphylococcus aureus) is prepared by overexpressing the subunits in E. coli. The topo IV is supplied as a heterotetramer complex in Dilution buffer. It is supplied with 5X concentrated Assay Buffer and Dilution buffers

Product Information

Species S. aureus

Source E.coli

Form Liquid

EC Number EC 5.99.1.

Purity >95%

Activity 5 U/μl

Storage and Shipping Information

Storage at -80°C
