

Chicken Bone Collagen

Cat. No. CEFX-086

Lot. No. (See product label)

Introduction

Description Chicken Bone Collagen is a protein that occurs naturally in chickens' cartilage, bone and tissues. Chicken Bone Collagen is usually extracted from cartilage and synthetically produced into injectable solutions or supplements. Chicken Bone Collagen is also known as Type II Collagen or Collagen Type II.

Applications Chicken bone type II collagen consists of three helical strands of polypeptide chains, a structure that gives collagen good elasticity and toughness. It has similar properties to human cartilage tissue and can maintain and restore the normal function of joints, bones, skin and other tissues.

Product Information

Source Chicken

Form Powder

Purity Protein 60%; Mucopolysaccharide 26%

Storage and Shipping Information

Storage 2 years under well storage situation and stored away from direct sun light
