

AG13958

Cat. No. CEI-1080

Lot. No. (See product label)

Introduction

Description AG13958 is a VEGF inhibitor in clinical development by Pfizer for treatment of age-related macular degeneration.

Synonyms CD309, FLK1, VEGFR, VEGFR2

Product Information

CAS No. 319460-94-1

Molecular Formula C₂₆H₂₂FN₇O

Chemical Name (E)-N-(2-fluoro-5-(3-(2-(pyridin-2-yl)vinyl)-1H-indazol-6-ylamino)phenyl)-1,3-dimethyl-1H-pyrazole-5-carboxamide

Molecular Weight 467.5

Purity > 95%

Targets VEGFR

Solubility DMSO > 112mg/mL Water >1mg/mL Ethanol > 4mg/mL

Storage and Shipping Information

Storage -20 centigrade

Stability 2 years -20 centigrade Powder 1 month -4 centigrade in DMSO More than one month -80 centigrade in DMSO
