

Recombinant Adenine phosphoribosyltransferase from Thermus thermophilus

Cat. No. NATE-1005

Lot. No. (See product label)

Introduction

Description Adenine phosphoribosyltransferase is widely spread in nature, it is produced in bacteria and eukaryotes,

participates in the alternative de novo synthesis of purine nucleotides.

Synonyms EC 2.4.2.7; APRT

Product Information

Species Thermus thermophilus

Source E. coli

Appearance Colourless clear liquid

EC Number EC 2.4.2.7

CAS No. 9027-80-9

Molecular

19 kDa

Weight

Purity > 80 %

Storage and Shipping Information

Storage Store at -20 degree C, for extended storage, conserve at -20 degree C or -80 degree C.
