

Recombinant Phosphoribosylpyrophosphate synthetase from *E. coli*

Cat. No. NATE-1007

Lot. No. (See product label)

Introduction

Description Phosphoribosylpyrophosphate (PRPP) synthetase participates in the biosynthesis in bacteria of purine nucleotides, pyrimidine nucleotides, tryptophan, histidine, and the pyridine nucleotide coenzymes.

Synonyms PRPP synthetase

Product Information

Species *E. coli*

Source *E. coli*

Appearance Colourless clear liquid

CAS No. 9031-46-3

Molecular Weight 34 kDa

Purity > 80 %

Storage and Shipping Information

Storage Store at -20 degree C, for extended storage, conserve at -20 degree C or -80 degree C.
