

## Cystathionine β-lyase, Recombinant

Cat. No. NATE-1146

Lot. No. (See product label)

## Introduction

**Description** In enzymology, a cystathionine beta-lyase (EC 4.4.1.8) is an enzyme that catalyzes the chemical

reaction: L-cystathionine + H2O  $\leftrightarrow$  L-homocysteine + NH3 + pyruvate. Thus, the two substrates of this enzyme are L-cystathionine and H2O, whereas its 3 products are L-homocysteine, NH3, and pyruvate.

This enzyme belongs to the family of lyases, specifically the class of carbon-sulfur lyases.

*Applications* This protein can be used for producing Hcy in vitro diagnosis Kit .

**Synonyms** L-cystathionineL-homocysteine-lyase (deaminating; pyruvate-forming); beta-cystathionase; cystine

lyase; cystathionine L-homocysteine-lyase (deaminating); L-cystathionineL-homocysteine-lyase

(deaminating); Cystathionine  $\beta$ -lyase; EC 4.4.1.8

## **Product Information**

Appearance Lyophilized powder or liquid

**EC Number** EC 4.4.1.8

*CAS No.* 9055-05-4

Molecular

Weight

vergine

**Purity** >90% (by SDS-PAGE)

6.49

56KD

Isoelectric

pH Stability

point

7.0-9.0

•

**Buffer** PBS, pH7.4

## Storage and Shipping Information

**Storage** The lyophilized powder should be stored at -20°C where it is stable for up to several years. The solution

could be stored at 4°C where it is stable for up to 1 year. Repeated freezing and thawing cycles of the

1/1

reconstituted solution is not recommended.
