

Casein Kinase II from Human, Recombinant

Cat. No. NATE-1271

Lot. No. (See product label)

Introduction

Description The Casein kinase 2 (EC 2.7.11.1) is a serine/threonine-selective protein kinase that is a tetramer of two alpha subunits and two beta subunits. The alpha subunits have the catalytic kinase domain. Casein kinase 2 has been implicated in cell cycle control, DNA repair, regulation of the circadian rhythm and other cellular processes.

Synonyms EC 2.7.11.1; Casein Kinase II; CK2; CK II; Casein Kinase 2
