

L-Citrulline 7-amido-4-methylcoumarin hydrobromide

Cat. No. CSUB-0062

Lot. No. (See product label)

Introduction

Applications L-Citrulline 7-amido-4-methylcoumarin is used as a sensitive fluorogenic substrate for citrulline ureidase, yielding a blue solution upon cleavage.

Synonyms L-Citrulline 4-methyl-7-coumarinylamide hydrobromide

Product Information

CAS No. 123314-39-6

Molecular Formula C₁₆H₂₀N₄O₄ · HBr

Molecular Weight 413.27

Substrates Aminopeptidase

Storage and Shipping Information

Storage 2-8°C
