

diacetyl reductase [(R)-acetoin forming]

Cat. No. EXWM-0214

Lot. No. (See product label)

Introduction

Description

The reaction is catalysed in the reverse direction. This activity is usually associated with butanediol dehydrogenase activity (EC 1.1.1.4 or EC 1.1.1.76). While the butanediol dehydrogenase activity is reversible, diacetyl reductase activity is irreversible. This enzyme has been reported in the yeast *Saccharomyces cerevisiae*. Different from EC 1.1.1.304, diacetyl reductase [(S)-acetoin forming].

Synonyms

(R)-acetoin dehydrogenase

Product Information

Form

Liquid or lyophilized powder

EC Number

EC 1.1.1.303

Reaction

(R)-acetoin + NAD⁺ = diacetyl + NADH + H⁺

Notes

This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage

Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
