

## coenzyme F420 hydrogenase

Cat. No. EXWM-0524

Lot. No. (See product label)

## Introduction

Description	An iron-sulfur flavoprotein (FAD) containing nickel. The enzyme from some sources contains
	selenocysteine. The enzyme also reduces the riboflavin analogue of F420, flavins and methylviologen, but
	to a lesser extent. The hydrogen acceptor coenzyme F420 is a deazaflavin derivative.

*Synonyms* 8-hydroxy-5-deazaflavin-reducing hydrogenase; F420-reducing hydrogenase; coenzyme F420-dependent hydrogenase

## **Product Information**

Form	Liquid or lyophilized powder
EC Number	EC 1.12.98.1
CAS No.	9027-05-8
Reaction	H2 + oxidized coenzyme F420 = reduced coenzyme F420
Notes	This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

## Storage and Shipping Information

**Storage** Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
