

## albonoursin synthase

Cat. No. EXWM-1374 Lot. No. (See product label)

| Introduction                          |   |
|---------------------------------------|---|
| <i>Description</i><br><i>Synonyms</i> | A flavoprotein from the bacterium Streptomyces noursei. The enzyme can also<br>oxidize several other cyclo dipeptides, the best being cyclo(L-tryptophyl-L-<br>tryptophyl) and cyclo(L-phenylalanyl-L-phenylalanyl).<br>cyclo(dipeptide):oxygen oxidoreductase; cyclic dipeptide oxidase; AlbA          |
| Synonyms                              | cyclo(dipeptide).oxygen oxidoreddctase, cyclic dipeptide oxidase, AbA   |
| Product Information                   |   |
| Form                                  | Liquid or lyophilized powder  |
| EC Number                             | EC 1.3.3.13   |
| Reaction                              | cyclo(L-leucyl-L-phenylalanyl) + 2 O2 = albonoursin + 2 H2O2 (overall reaction);<br>(1a) cyclo(L-leucyl-L-phenylalanyl) + O2 = cyclo[(Z)- $\alpha$ , $\beta$ -didehydrophenylalanyl-L-<br>leucyl] + H2O2; (1b) cyclo[(Z)- $\alpha$ , $\beta$ -didehydrophenylalanyl-L-leucyl] + O2 = albonoursin + H2O2 |
| Notes                                 | This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.  |
| Storage and Shipping Information      |   |

Storage and Shipping Information

Storage

Store it at +4 °C for short term. For long term storage, store it at -20 °C $\sim$ -80 °C.
