

trans-aconitate 2-methyltransferase

Cat. No. EXWM-1740

Lot. No. (See product label)

Introduction

Description

Also catalyses the formation of the methyl monoester of cis-aconitate, isocitrate and citrate, but more slowly. While the enzyme from *Escherichia coli* forms (E)-3-(methoxycarbonyl)-pent-2-enedioate as the product, that from *Saccharomyces cerevisiae* forms (E)-2-(methoxycarbonylmethyl)butenedioate and is therefore classified as a separate enzyme (cf. EC 2.1.1.145, trans-aconitate 3-methyltransferase).

Product Information

Form Liquid or lyophilized powder

EC Number EC 2.1.1.144

CAS No. 235107-12-7

Reaction S-adenosyl-L-methionine + trans-aconitate = S-adenosyl-L-homocysteine + (E)-3-(methoxycarbonyl)pent-2-enedioate

Notes This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
