Creative Enzymes®

Enzyme blend for egg birds

Cat. No. FEED-2326

Lot. No. (See product label)

Introduction

Description	Complex enzyme for egg birds is one of complex enzyme, which is designed according to poultry physiological characteristics and feed raw materials. This Complex enzyme is mainly the non-starch polysaccharide enzymes, with other enzymes including the protease and amylase, which can well suit for character of the poultry digestive tract. The products through much optimization experiment, which can well digest non-starch polysaccharide, improve the use rate of feed.
Applications	1.This Complex enzyme can digest starch polysaccharide, and effectively digest the cellulase, xylanase, beta-dextranase and so on in the feed,which can reduce the viscosity of chymus, mach with the endogenous enzyme , using of grains mixed meal efficiently, reducing about 5% of daily ration to add complex enzyme .This Complex enzyme can well digest protein , add amino acids for poultry ,and optimize the nutritional composition . 2.Destroy plant cell, promote cells nutrient release , improve nutrient substance of feed, expand the raw material type. 3. Restrain Intestinal harmful organisms to grow efficient, increase the quantity of beneficial microorganisms, maintain the dynamic balance of animal gut microbes, reduce diarrhea, and enhance immunity and disease resistance of animal, increase the cycle of the laying. egg..
Synonyms	egg birds; digest non-starch polysaccharide; improve the use rate of feed; feed enzyme; rate of feed; Enzyme blend for egg birds; FEED-2326

Product Information

Appearance	powder

Usage and Packaging

Package	25kg/barrel or subject to client requirement.
