

23S rRNA (adenine2030-N6)-methyltransferase

Cat. No. EXWM-1871

Lot. No. (See product label)

Introduction

Description The recombinant RImJ protein is most active in methylating deproteinized 23S

ribosomal subunit, and does not methylate the completely assembled 50S subunits.

1/1

Synonyms YhiR protein; rlmJ (gene name); m6A2030 methyltransferase

Product Information

Form Liquid or lyophilized powder

EC Number EC 2.1.1.266

Reaction S-adenosyl-L-methionine + adenine2030 in 23S rRNA = S-adenosyl-L-homocysteine

+ N6-methyladenine2030 in 23S rRNA

Notes This item requires custom production and lead time is between 5-9 weeks. We can

custom produce according to your specifications.

Storage and Shipping Information

Storage Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
