

## octanoyl-[GcvH]:protein N-octanoyltransferase

Cat. No. EXWM-2149 Lot. No. (See product label)

Introduction	
Description Synonyms	In the bacterium Bacillus subtilis it has been shown that the enzyme catalyses theamidotransfer of the octanoyl moiety from [glycine cleavage system H]-N6- octanoyl-L-lysine (i.e. octanoyl-GcvH) to the E2 subunit (dihydrolipoamide acetyltransferase) of pyruvate dehydrogenase. LipL; octanoyl-[GcvH]:E2 amidotransferase; ywfL (gene name)
Product Information	
Form	Liquid or lyophilized powder
EC Number	EC 2.3.1.204
Reaction	[glycine cleavage system H]-N6-octanoyl-L-lysine + a [lipoyl-carrier protein] = glycine cleavage system H + a [lipoyl-carrier protein]-N6-octanoyl-L-lysine
Notes	This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.
Storage and Shipping Information	
Storage	Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
