

## [acyl-carrier-protein] S-acetyltransferase

Cat. No. EXWM-2216

Lot. No. (See product label)

## Introduction

**Description** This enzyme, along with EC 2.3.1.39, [acyl-carrier-protein] S-malonyltransferase, is

essential for the initiation of fatty-acid biosynthesis in bacteria. The substrate acetyl-CoA protects the enzyme against inhibition by N-ethylmaleimide or

iodoacetamide. This is one of the activities associated with β-ketoacyl-ACP synthase

III (EC 2.3.1.180).

**Synonyms** acetyl coenzyme A-acyl-carrier-protein transacylase; [acyl-carrier-

protein]acetyltransferase; [ACP]acetyltransferase; ACAT; acetyl-CoA:[acyl-carrier-

1/1

protein] S-acetyltransferase

## **Product Information**

**Form** Liquid or lyophilized powder

**EC Number** EC 2.3.1.38

*CAS No.* 37257-16-2

**Reaction** acetyl-CoA + an [acyl-carrier protein] = CoA + an acetyl-[acyl-carrier protein]

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can

custom produce according to your specifications.

## Storage and Shipping Information

**Storage** Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
