

formate C-acetyltransferase

Cat. No. EXWM-2234

Lot. No. (See product label)

Introduction

Description In enzymology, formate C-acetyltransferase (pyruvate formate lyase, PFL) (EC 2.3.1.54) is an enzyme. Pyruvate formate lyase is found in Escherichia coli and other organisms. It helps regulate anaerobic glucose metabolism. Using radical non-redox chemistry, it catalyzes the reversible conversion of pyruvate and coenzyme-A into formate and acetyl-CoA.

Synonyms pyruvate formate-lyase; pyruvic formate-lyase; formate acetyltransferase

Product Information

Form Liquid or lyophilized powder

EC Number EC 2.3.1.54

CAS No. 9068-08-0

Reaction acetyl-CoA + formate = CoA + pyruvate

Notes This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
