

## Lysostaphin from Staphylococcus simulans, Recombinant

Cat. No. NATE-0430

Lot. No. (See product label)

## Introduction

**Description** Lysostaphin is a Staphylococcus simulans metalloendopeptidase. It can function as an antimicrobial

against Staphylococcus aureus. Lysostaphin is a 27 KDa glycylglycine endopeptidase, an antibacterial enzyme which is capable of cleaving the crosslinking pentaglycin bridges in the cell wall of Staphylococci.

Applications Lysostaphin from Staphyl oc occus simulans has been used in a study to assess molecular cloning,

sequencing, and expression of lytM, a unique autolytic gene of Staphyl oc occus aureus. It has also been used in a study to investigate the sequence analysis of a Staphyl oc occus aureus gene encoding a

peptidoglycan hydrolase activity.

**Synonyms** Lysostaphin; EC 3.4.24.75; glycyl-glycine endopeptidase; 9011-93-2

## **Product Information**

**Species** Staphylococcus simulans

**Source** E. coli

Form Type I, lyophilized powder, Contains potassium phosphate buffer salts and sodium chloride; Type II,

lyophilized powder.

**EC Number** EC 3.4.24.75

**CAS No.** 9011-93-2

**Activity** Type I, > 2,000 units/mg protein; Type II, > 500 units/mg protein.

## Storage and Shipping Information

*Storage* −20°C

**Tel:** 1-631-562-8517 1-516-512-3133 **Email:** info@creative-enzymes.com
