

aminodeoxyfutalosine synthase

Cat. No. EXWM-2736

Lot. No. (See product label)

Introduction

Description

This enzyme is a member of the 'AdoMet radical' (radical SAM) family. S-Adenosyl-L-methionine acts as both a radical generator and as the source of the transferred adenosyl group. The enzyme, found in several bacterial species, is part of the futasine pathway for menaquinone biosynthesis.

Synonyms
