

## Native Clostridium perfringens (C. welchii) Neuraminidase

Cat. No. NATE-0480

Lot. No. (See product label)

## Introduction

**Description** Neuraminidase enzymes are glycoside hydrolase enzymes (EC 3.2.1.18) that cleave the glycosidic

linkages of neuraminic acids. Neuraminidase enzymes are a large family, found in a range of organisms. The best-known neuraminidase is the viral neuraminidase, a drug target for the prevention of the spread of influenza infection. The viral neuraminidases are frequently used as antigenic determinants found on the surface of the Influenza virus. Some variants of the influenza neuraminidase confer more virulence to the virus than others. Other homologs are found in mammalian cells, which have a range of functions. At least four mammalian sialidase homologs have been described in the human genome (see NEU1, NEU2,

NEU3, NEU4).

Applications Neuron-specific enolase from human brain has been used in a study to assess human amniotic

mesenchymal stem cells in the treatment of f ocal cerebral ischemia. It has also been used in a study to

investigate sinonasal terat ocarcinosarcoma with rhabdoid features.

**Synonyms** neuraminidase; sialidase;  $\alpha$ -neuraminidase; acetylneuraminidase; exo- $\alpha$ -sialidase; EC 3.2.1.18

## **Product Information**

**Source** Clostridium perfringens (C. welchii)

Form buffered aqueous solution; Solution in 100 mM Tris-HCl, 5 mM MgSO4, 250 mM KCl, pH 5.0-5.2

**EC Number** EC 3.2.1.18

**Purity** > 95% (SDS-PAGE)

**Pathway** Gluconeogenesis, organism-specific biosystem; Gluconeogenesis, oxaloacetate => fructose-6P,

organism-specific biosystem; Gluconeogenesis, oxaloacetate => fructose-6P, conserved biosystem;

Glucose metabolism, organism-specific biosystem; Glycolysis, organism-specific biosystem

**Function** Iyase activity; magnesium ion binding; phosphopyruvate hydratase activity

Unit One unit causes the formation of 1.0 μmole of phospho (enol)pyruvate per minute at pH 6.8 at 25°C

Definition

## Storage and Shipping Information

*Storage* −20°C
