

glycerone kinase

Cat. No. EXWM-3059

Lot. No. (See product label)

Introduction

Description

This enzyme belongs to the family of transferases, specifically those transferring phosphorus-containing groups (phosphotransferases) with an alcohol group as acceptor. The systematic name of this enzyme class is ATP:glycerone phosphotransferase. Other names in common use include dihydroxyacetone kinase, acetol kinase, and acetol kinase (phosphorylating). This enzyme participates in glycerolipid metabolism.

Synonyms

dihydroxyacetone kinase; acetol kinase; acetol kinase (phosphorylating)

Product Information

Form

Liquid or lyophilized powder

EC Number

EC 2.7.1.29

CAS No.

57657-66-6

Reaction

ATP + glycerone = ADP + glycerone phosphate

Notes

This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage

Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
