

isopentenyl phosphate kinase

Cat. No. EXWM-3208 Lot. No. (See product label)

| Introduction | |
|----------------------------------|---|
| Description | The enzyme is involved in the mevalonate pathway in Archaea. The activity has also been identified in the plant Mentha piperita (peppermint). It is strictly specific for ATP but can use other phosphate acceptors such as dimethylallyl phosphate, geranyl phosphate, or fosfomycin. |
| Product Information | |
| Form | Liquid or lyophilized powder |
| EC Number | EC 2.7.4.26 |
| Reaction | ATP + isopentenyl phosphate = ADP + isopentenyl diphosphate |
| Notes | This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications. |
