

## phosphatidylglycerol-membrane-oligosaccharide glycerophosphotransferase

Cat. No. EXWM-3320

Lot. No. (See product label)

### Introduction

**Description** 1,2-β- and 1,6-β-linked glucose residues in membrane polysaccharides and in synthetic glucosides can act as acceptors.

**Synonyms** phosphoglycerol transferase; oligosaccharide glycerophosphotransferase; phosphoglycerol transferase I

### Product Information

**Form** Liquid or lyophilized powder

**EC Number** EC 2.7.8.20

**CAS No.** 80146-86-7

**Reaction** phosphatidylglycerol + membrane-derived-oligosaccharide D-glucose = 1,2-diacyl-sn-glycerol + membrane-derived-oligosaccharide 6-(glycerophospho)-D-glucose

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

### Storage and Shipping Information

**Storage** Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
