

## membrane-oligosaccharide glycerophosphotransferase

Cat. No. EXWM-3321

Lot. No. (See product label)

### Introduction

#### Description

β-Linked glucose residues in simple glucosides, such as gentiobiose, can act as acceptors. In the presence of low concentrations of acceptor, free cyclic 1,2-phosphoglycerol is formed.

#### Synonyms

periplasmic phosphoglycerotransferase; phosphoglycerol cyclase

### Product Information

#### Form

Liquid or lyophilized powder

#### EC Number

EC 2.7.8.21

#### CAS No.

80146-86-7

#### Reaction

Transfer of a glycerophospho group from one membrane-derived oligosaccharide to another

#### Notes

This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

### Storage and Shipping Information

#### Storage

Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
