

## Native Pseudomonas sp. Protocatechuate 3, 4-dioxygenase

Cat. No. DIA-214

Lot. No. (See product label)

### Introduction

<b>Description</b>	In enzymology, a protocatechuate 3,4-dioxygenase (EC 1.13.11.3) is an enzyme that catalyzes the chemical reaction: 3,4-dihydroxybenzoate + O <sub>2</sub> ↔ 3-carboxy-cis,cis-muconate. Thus, the two substrates of this enzyme are 3,4-dihydroxybenzoate (protocatechuic acid) and O <sub>2</sub> , whereas its product is 3-carboxy-cis,cis-muconate. This enzyme belongs to the family of oxidoreductases, specifically those acting on single donors with O <sub>2</sub> as oxidant and incorporation of two atoms of oxygen into the substrate (oxygenases). This enzyme participates in benzoate degradation via hydroxylation and 2,4-dichlorobenzoate degradation. It employs one cofactor, iron.
<b>Applications</b>	This enzyme is useful for enzymatic determination of choline esterase when coupled with p-hydroxybenzoate hydroxylase.
<b>Synonyms</b>	EC 1.13.11.3; Protocatechuate 3,4-dioxygenase; protocatechuate: oxygen 3,4-oxidoreductase (decyclizing); protocatechuate oxygenase; protocatechuic acid oxidase; protocatechuic 3,4-dioxygenase; protocatechuic 3,4-oxygenase

### Product Information

<b>Source</b>	Pseudomonas sp.
<b>Appearance</b>	Light brown amorphous powder, lyophilized
<b>EC Number</b>	EC 1.13.11.3
<b>CAS No.</b>	9029-47-4
<b>Molecular Weight</b>	approx. 700 kDa
<b>Activity</b>	GradeIII 3.0U/mg-solid or more (containing approx. 40% of stabilizers)
<b>Contaminants</b>	NADPH oxidase < 1.0×10 <sup>-1</sup> %
<b>pH Stability</b>	pH 7.0-9.0 (25°C, 72hr)
<b>Optimum pH</b>	9
<b>Thermal stability</b>	below 50°C (pH 6.0, 1hr)
<b>Optimum temperature</b>	60-65°C
<b>Michaelis Constant</b>	1.85×10 <sup>-5</sup> M (Protocatechuate)
<b>Structure</b>	Protein with nonheme iron
<b>Inhibitors</b>	Ag <sup>+</sup> , Hg <sup>++</sup> , PCMB
<b>Stabilizers</b>	Sugars

### ***Storage and Shipping Information***

**Stability**      Store at -20°C (A decrease in activity of ca. 20% may occur within one year)
