

## aminopeptidase Ey

Cat. No. EXWM-4017

Lot. No. (See product label)

### Introduction

**Description** A zinc glycoprotein in peptidase family M1 (membrane alanyl aminopeptidase family), composed of two 150 kDa subunits. From the plasma fraction of hen egg yolk

### Product Information

**Form** Liquid or lyophilized powder

**EC Number** EC 3.4.11.20

**CAS No.** 9031-94-1

**Reaction** Differs from other aminopeptidases in broad specificity for amino acids in the P1 position and the ability to hydrolyse peptides of four or five residues that contain Pro in the P1' position

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

### Storage and Shipping Information

**Storage** Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
