

PepB aminopeptidase

Cat. No. EXWM-4020

Lot. No. (See product label)

Introduction

Description A 270-kDa protein composed of six 46.3-kDa subunits. The pH optimum is in the alkaline range and activity is stimulated by KCl. In peptidase family M17.

Synonyms Salmonella enterica serovar Typhimurium peptidase B

Product Information

Form Liquid or lyophilized powder

EC Number EC 3.4.11.23

CAS No. 928346-44-5

Reaction Release of an N-terminal amino acid, Xaa, from a peptide or arylamide. Xaa is preferably Glu or Asp but may be other amino acids, including Leu, Met, His, Cys and Gln

Notes This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
