

coagulation factor XIIa

Cat. No. EXWM-4132

Lot. No. (See product label)

Introduction

Description

Also activates plasminogen and plasma prokallikrein. Formed from the proenzyme, factor XII, by plasma kallikrein or factor XIIa. In peptidase family S1 (trypsin family)

Synonyms

Hageman factor (activated); blood-coagulation factor XII_f; activated β blood-coagulation factor XII; prealbumin activator; Hageman factor β -fragment; Hageman factor fragment HFF; blood-coagulation factor XIIa β ; prekallikrein activator; kallikreinogen activator

Product Information

Form

Liquid or lyophilized powder

EC Number

EC 3.4.21.38

CAS No.

75216-42-1

Reaction

Selective cleavage of Arg-Ile bonds in factor VII to form factor VIIa and factor XI to form factor XIa

Notes

This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage

Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
