

## γ-renin

Cat. No. EXWM-4146

Lot. No. (See product label)

### Introduction

#### Description

A member of the tissue kallikrein family, from submandibular glands of male mice. In peptidase family S1 (trypsin family)

### Product Information

#### Form

Liquid or lyophilized powder

#### EC Number

EC 3.4.21.54

#### CAS No.

85270-20-8

#### Reaction

Cleavage of the Leu-Leu bond in synthetic tetradecapeptide renin substrate (horse), to produce angiotensin I, but not active on natural angiotensinogen, unlike renin (EC 3.4.23.15). Also hydrolyses Bz-Arg-p-nitroanilide

#### Notes

This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

### Storage and Shipping Information

#### Storage

Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
