

γ-renin

Cat. No. EXWM-4146

Lot. No. (See product label)

Introduction

Description A member of the tissue kallikrein family, from submandibular glands of male mice. In peptidase family S1 (trypsin family)

Product Information

Form Liquid or lyophilized powder

EC Number EC 3.4.21.54

CAS No. 85270-20-8

Reaction Cleavage of the Leu-Leu bond in synthetic tetradecapeptide renin substrate (horse), to produce angiotensin I, but not active on natural angiotensinogen, unlike renin (EC 3.4.23.15). Also hydrolyses Bz-Arg-p-nitroanilide

Notes This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
