

memapsin 1

Cat. No. EXWM-4282

Lot. No. (See product label)

Introduction

Description Can cleave β-amyloid precursor protein to form the amyloidogenic β-peptide that is

implicated in the pathology of Alzheimers disease, but is not significantly expressed in human brain. In peptidase family A1, but is atypical in containing a C-terminal

membrane-spanning domain.

Synonyms β-secretase; β-site Alzheimers amyloid precursor protein cleaving enzyme 2

(BACE2); ASP1; Down region aspartic protease

Product Information

Form Liquid or lyophilized powder

EC Number EC 3.4.23.45

CAS No. 447457-31-0

Reaction Broad endopeptidase specificity. Cleaves Glu-Val-Asn-Leu+Asp-Ala-Glu-Phe in the

Swedish variant of Alzheimers amyloid precursor protein

Notes This item requires custom production and lead time is between 5-9 weeks. We can

custom produce according to your specifications.

Storage and Shipping Information

Store it at +4 °C for short term. For long term storage, store it at -20 °C \sim -80 °C.
