

# microbial collagenase

Cat. No. EXWM-4311

Lot. No. (See product label)

#### Introduction

### Description

Six species of metalloendopeptidase acting on native collagen can be isolated from the medium of Clostridium histolyticum. Class I has forms  $\alpha$  (68 kDa),  $\beta$  (115 kDa) and  $\gamma$  (79 kDa); class II has  $\Delta$  (100 kDa),  $\epsilon$  (110 kDa) and  $\zeta$  (125 kDa). The two classes are immunologically crossreactive, but have significantly different sequences, and different specificities such that their actions on collagen are complementary. The enzymes also act as peptidyl-tripeptidases. Variants of the enzyme have been purified from Bacillus cereus, Empedobacter collagenolyticum, Pseudomonas marinoglutinosa, and species of Vibrio, Vibrio B-30 (ATCC 21250) and V. alginolyticus (previously Achromobacter iophagus). Also known from Streptomyces sp.. The Vibrio enzyme is the type example of peptidase family M9.

### **Synonyms**

Clostridium histolyticum collagenase; clostridiopeptidase A; collagenase A; collagenase I; Achromobacter iophagus collagenase; collagenase; aspergillopeptidase C; nucleolysin; azocollase; metallocollagenase; soycollagestin; Clostridium histolyticum proteinase A; clostridiopeptidase II; MMP-8; clostridiopeptidase I; collagen peptidase; collagen protease; collagenase MMP-1; metalloproteinase-1; kollaza; matrix metalloproteinase-1; MMP-1; matrix metalloproteinase-8; matirx metalloproteinase-18; interstitial collagenase

## **Product Information**

**Form** Liquid or lyophilized powder

**EC Number** EC 3.4.24.3

*CAS No.* 9001-12-1

**Reaction** Digestion of native collagen in the triple helical region at +Gly bonds. With synthetic peptides, a

preference is shown for Gly at P3 and P1', Pro and Ala at P2 and P2', and hydroxyproline, Ala or Arg at P3'

1/1

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can custom produce

according to your specifications.

## Storage and Shipping Information

**Storage** Store it at +4 °C for short term. For long term storage, store it at -20 °C $\sim$ -80 °C.
