

## membrane-type matrix metalloproteinase-1

Cat. No. EXWM-4364

Lot. No. (See product label)

## Introduction

**Description** In peptidase family M10, but, unlike most members of the family, is membrane-

anchored. Believed to play an important role in the activation of progelatinase A at

cell surfaces.

**Synonyms** matrix metalloproteinase 14

## **Product Information**

**Form** Liquid or lyophilized powder

**EC Number** EC 3.4.24.80

**CAS No.** 161384-17-4

**Reaction** Endopeptidase activity. Activates progelatinase A by cleavage of the propeptide at

Asn37†Leu. Other bonds hydrolysed include Gly35†lle in the propeptide of collagenase 3, and Asn341†Phe, Asp441†Leu and Gln354†Thr in the aggrecan

1/1

interglobular domain

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can

custom produce according to your specifications.

## Storage and Shipping Information

**Store** it at +4 °C for short term. For long term storage, store it at -20 °C $\sim$ -80 °C.
