

## Cl--transporting ATPase

Cat. No. EXWM-4648

Lot. No. (See product label)

### Introduction

#### Description

A P-type ATPase that undergoes covalent phosphorylation during the transport cycle. An animal and plant enzyme involved in the import of chloride anions.

#### Synonyms

Cl--translocating ATPase; Cl--motive ATPase

### Product Information

#### Form

Liquid or lyophilized powder

#### EC Number

EC 3.6.3.11

#### Reaction

ATP + H<sub>2</sub>O + Cl-out = ADP + phosphate + Cl-in

#### Notes

This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

### Storage and Shipping Information

#### Storage

Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
