

nucleoplasmin ATPase

Cat. No. EXWM-4701

Lot. No. (See product label)

Introduction

Description

An acidic nuclear protein that is active in the ATP-dependent assembly of nucleosome cores, in decondensation of sperm chromatin and in other histone-involving processes.

Product Information

Form

Liquid or lyophilized powder

EC Number

EC 3.6.4.11

Reaction

ATP + H₂O = ADP + phosphate

Notes

This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage

Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
