

## germacrene-A synthase

Cat. No. EXWM-5180

Lot. No. (See product label)

## Introduction

**Description** Requires Mg2+ for activity. While germacrene A is an enzyme-bound intermediate in the biosynthesis of a

number of phytoalexins, e.g. EC 4.2.3.9 (aristolochene synthase) from some species and EC 4.2.3.21

(vetispiradiene synthase), it is the sole sesquiterpenoid product formed in chicory.

**Synonyms** germacrene A synthase; (+)-germacrene A synthase; (+)-(10R)-germacrene A synthase; GAS; 2-trans,6-

trans-farnesyl-diphosphate diphosphate-lyase (germacrene-A-forming)

## **Product Information**

**Form** Liquid or lyophilized powder

**EC Number** EC 4.2.3.23

**CAS No.** 213763-55-4

**Reaction** (2E,6E)-farnesyl diphosphate = (+)-(R)-gemacrene A + diphosphate

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can custom produce

according to your specifications.

## Storage and Shipping Information

Store it at +4 °C for short term. For long term storage, store it at -20 °C∼-80 °C.
