

D-erythrulose 4-phosphate isomerase

Cat. No. EXWM-5474

Lot. No. (See product label)

Introduction

Description The enzyme, characterized from the pathogenic bacterium *Brucella abortus*, which causes brucellosis in livestock, participates in erythritol catabolism.

Synonyms eryI (gene name)

Product Information

Form Liquid or lyophilized powder

EC Number EC 5.3.1.34

Reaction D-erythrulose 4-phosphate = D-erythrose 4-phosphate

Notes This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
