

neoxanthin synthase

Cat. No. EXWM-5517

Lot. No. (See product label)

Introduction

Description The opening of the epoxide ring of violaxanthin generates a chiral allene. Neoxanthin is a precursor of the plant hormone abscisic acid and the last product of carotenoid synthesis in green plants.

Synonyms NSY

Product Information

Form Liquid or lyophilized powder

EC Number EC 5.3.99.9

CAS No. 318960-21-3

Reaction violaxanthin = neoxanthin

Notes This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
