

## halimadienyl-diphosphate synthase

Cat. No. EXWM-5617

Lot. No. (See product label)

## Introduction

**Description** Requires Mg2+ for activity. This enzyme is found in pathogenic prokaryotes such as Mycobacterium

tuberculosis but not in non-pathogens such as Mycobacterium smegmatis so may play a role in pathogenicity. The product of the reaction is subsequently dephosphorylated yielding tuberculosinol

(halima-5,13-dien-15-ol).

Synonyms Rv3377c; halimadienyl diphosphate synthase; tuberculosinol diphosphate synthase; halima-5(6),13-dien-

15-yl-diphosphate lyase (cyclizing); halima-5,13-dien-15-yl-diphosphate lyase (decyclizing)

## **Product Information**

Form Liquid or lyophilized powder

**EC Number** EC 5.5.1.16

**Reaction** geranylgeranyl diphosphate = tuberculosinyl diphosphate

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can custom produce

according to your specifications.

## Storage and Shipping Information

Store it at +4 °C for short term. For long term storage, store it at -20 °C∼-80 °C.
