

## carnosine synthase

Cat. No. EXWM-5732

Lot. No. (See product label)

## Introduction

**Description** This enzyme was thought to form AMP, but studies with highly purified enzyme proved that it forms ADP.

Carnosine is a dipeptide that is present at high concentrations in skeletal muscle and the olfactory bulb of vertebrates. It is also found in the skeletal muscle of some invertebrates. The enzyme can also catalyse the formation of homocarnosine from 4-aminobutanoate and L-histidine, with much lower activity.

**Synonyms** carnosine synthetase; carnosine-anserine synthetase; homocarnosine-carnosine synthetase; carnosine-

homocarnosine synthetase;L-histidine:β-alanine ligase (AMP-forming) (incorrect)

## **Product Information**

**Form** Liquid or lyophilized powder

**EC Number** EC 6.3.2.11

**CAS No.** 9023-61-4

**Reaction** ATP + L-histidine +  $\beta$ -alanine = ADP + phosphate + carnosine

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can custom produce

according to your specifications.

## Storage and Shipping Information

**Storage** Store it at +4 °C for short term. For long term storage, store it at -20 °C $\sim$ -80 °C.

**Tel:** 1-631-562-8517 1-516-512-3133 **Email:** info@creative-enzymes.com
