

## coenzyme F420-0:L-glutamate ligase

Cat. No. EXWM-5748

Lot. No. (See product label)

## Introduction

**Description** This protein catalyses the successive addition of two glutamate residues to cofactor

F420 by two distinct and independent reactions. In the reaction described here the enzyme attaches a glutamate via its  $\alpha$ -amine group to F420-0. In the second reaction (EC 6.3.2.34, coenzyme F420-1- $\gamma$ -L-glutamate ligase) it catalyses the addition of a second L-glutamate residue to the  $\gamma$ -carboxyl of the first glutamate.

**Synonyms** CofE-AF; MJ0768; CofE

## **Product Information**

**Form** Liquid or lyophilized powder

**EC Number** EC 6.3.2.31

**Reaction** GTP + coenzyme F420-0 + L-glutamate = GDP + phosphate + coenzyme F420-1

**Notes** This item requires custom production and lead time is between 5-9 weeks. We can

custom produce according to your specifications.

## Storage and Shipping Information

**Storage** Store it at +4 °C for short term. For long term storage, store it at -20 °C $\sim$ -80 °C.
