

argininosuccinate synthase

Cat. No. EXWM-5797

Lot. No. (See product label)

Introduction

Description Argininosuccinate synthase or synthetase (ASS; EC 6.3.4.5) is an enzyme that catalyzes the synthesis of argininosuccinate from citrulline and aspartate. ASS is responsible for the third step of the urea cycle and one of the reactions of the citrulline-NO cycle.

Synonyms citrulline-aspartate ligase; argininosuccinate synthetase; arginine succinate synthetase; argininosuccinic acid synthetase; arginosuccinate synthetase

Product Information

Form Liquid or lyophilized powder

EC Number EC 6.3.4.5

CAS No. 9023-58-9

Reaction $\text{ATP} + \text{L-citrulline} + \text{L-aspartate} = \text{AMP} + \text{diphosphate} + 2\text{-(N}\omega\text{-L-arginino)succinate}$

Notes This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Storage and Shipping Information

Storage Store it at +4 °C for short term. For long term storage, store it at -20 °C~-80 °C.
